(Fibromyalgia Association UK & Fibro Action merged)

Fibromyalgia is a chronic condition of widespread pain and profound fatigue. The pain tends to be felt as diffuse aching or burning, often described as head to toe. It may be worse at some times than at others. It may also change location, usually becoming more severe in parts of the body that are used most.

UK FIBROMYALGIA

The independent voice of Fibromyalgia in the UK

UK Fibromyalgia has no ties to any one charity but instead it works with all groups and all charities to provide an independent overview for Britain's FM community.
